

ScanDEX

Scan, Index, and Archive Software

How Many Different Ways Do You Want To Find Your Documents?

- Direct Scanner Interface
- Scan, Index, and Archive in One Process
- Perform OCR to Extract Title Block Data
- Advanced Multi-Page TIFF Management
- Supports Context Scanners
- Direct Printing to Xerox 8825/8830, Océ 9400, and KIP Starprint 3000, or Any Windows Compatible Printer

ScanDEX

ScanDEX is a scanning, indexing, and archiving system for conversion of paper archives. With **ScanDEX** you can scan your images, store, and index them on an unlimited number of fields for fast retrieval. Various indexing features include automatically load images to be indexed, automatically zoom to areas on the image for each index field, use of default values and macros, etc. **ScanDEX** supports multiple scanners on a single workstation to speed up the archiving process. Multi-page management is also supported. **ScanDEX** also provides easy network and on-line access to your archives.

Scanning

ScanDEX supports all SCSI-based IDEAL Scanners, as well as any TWAIN or ISIS-Compatible Scanner. **ScanDEX** support all other scanners by using the disk scanner, which monitors a directory on the hard disk. If it finds a raster file, it performs the same operations as if the data was obtained directly from a scanner.

Indexing

ScanDEX automatically queues and displays the drawings to be indexed. While you index a drawing, the scanner continues working on making the next drawing available. This makes it possible to have one or more people perform the scanning and others perform the indexing and image processing. Separate the workload to optimize scanner and personnel utilization. Indexing can be done manually or automatically. Store your documents inside the database for easy administration or place your document files anywhere on the network.

Archiving

ScanDEX stores drawings and indexes data in an ODBC compliant archive in any format. This gives you the opportunity to integrate already existing digital archives into **ScanDEX**. You have instant on-line access to your digital archive and multiple users can work with the archive at the same time across the network. The user interface to the archive is easy and customizable.

ScanDEX

Scan, Index, and Archive Software

Specifications and Required/Recommended Hardware

Supported Scanners	All IDEAL Scanners TWAIN & ISIS Scanners All Others via Disk Scanner	Scanner Parameters	Scan Width up to 50" All ISO & ANSI Standard Sizes
DPI	25 to 1,800 dpi, depending on scanner used.	Scanning Modes	256 gray-tones 1-bit monochrome
Thresholding Methods	Manual Thresholding Automatic Adaptive B&W Thresholding Gray Adaptive Auto-Photo	Viewable File Formats Supported	Over 50 different raster file formats including TIFF, TIFF G4, CALS, CALS G4, JPEG, PCX, DCX, BMP, Adobe PhotoShop PSD, EPS, etc.
Number of Index Fields Supported	Unlimited	Created File Formats	TIFF, TIFF G4, CALS G4
Image Functions	<ul style="list-style-type: none"> • Flip • Invert • Reverse • Rotate • Trim • Auto-Trim • De-Skew • Auto-De-Skew • De-speckle • Measure 	Index Field Types	<ul style="list-style-type: none"> • Boolean • Byte • Date • Double • Long • Memo • Short • Single • Text
Database Format	Microsoft Jet Engine 3.0 Microsoft Access 7.0 or higher ODBC Complaint	Alternate Databases Supported	Microsoft SQL Server Oracle Any ODBC-Compliant Database
Installation Requirements	Pentium or greater PC 32Mb RAM Windows95/98 or NT 4.0	Recommended Hardware	Pentium II 266 or greater 64Mb RAM or greater WindowsNT 4.0 Workstation
Add-on's Available	ScanDEX/OCR – for Automatic Indexing from Title Block Info. PLUS VIEW – for viewing of over 150 different File Formats.	Additional Options Available	ScanDEX/CD – for CD-ROM delivery of ScanDEX database & images with integrated viewer.

Can be used stand-alone or as part of a ScanDEX Solution Set
